The drawings are objected to because drawings of reproducible copy are needed. Numerous characters are overly small and the handwritten notations are not easily read. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

In addition to the drawing requirement the examiner hopes applicant would consider and effect an amendment to the phrase "to be occurred" which appears in numerous places throughout the specification, including the drawings and claims. A more grammatical phrase would be simply "to occur".

The following is an examiner's statement of reasons for allowance: The art of record does not disclose using dummy switches with a less than one-to-one correspondence to the primary switches of the digital-to-analog converter.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
